

#	Question	Points	Answer
1	HTTP Get packet. Is your browser running HTTP version 1.0 or 1.1? What version of HTTP is the server running? How can you verify this information?	2	It is running HTTP 1.1 and it is requesting http 1.1
2	Is the HTTP packet sent over UDP or TCP?	1	TCP
3	What is the source and destination port of the HTTP GET?	1	Transmission Control Protocol, Src Port: http (80), Dst Port: 53762 (53762), Seq: 1, Ack: 155, Len: 187
4	What languages (if any) does your browser indicate that it can accept to the server?	1	N/A
5	What is the IP address of your computer (client)? Of the website server you are visiting?	1	172.16.10.128 Destination: 23.200.156.207
6	What is the status code returned by the server to your browser?	1	HTTP/1.1 200 OK\r\n
7	When was the HTML file that you are retrieving last modified at the server?	1	Thu, 06 Feb 2025 02:31:41 GMT
8	What other protocols were used by your computer to retrieve the content?	2	HTTP/TCP/IP/Ethernet

#	Question	Points	Answer
1	What protocols are used to carry SMTP packets?	2	Ethernet/IP/TCP/SMTP
2	Observe the SMTP header in Packet #18 (Open the Internet Message Format section of the SMTP packet). Find the information for every field of the header of this SMTP packet:		
2a	To:	1	teacher@starfish.eller.arizona.edu
2b	From:	1	student@starfish.eller.arizona.edu
2c	Date:	1	Sat, 27 Nov 2010 18:00:52 -0700
2d	Subject:	1	Class information
2e	Message ID #:	1	00a801cb8e97\$b41ebbb0\$1c5c3310\$@eller.arizona.edu
3	The first three frames are the three steps of the TCP startup. Frames 4 to 24, 26 contain the e-mail process and the e-mail message. Frames 25, 27-29 describe TCP shutdown.		
3a	What port number is used by the client? How do you know?	1	55012, temporary port number assigned by the TCP to this process
3b	What port number is used on the server? How do you know?	1	25, it is a well known port number for the SMTP server
4	Locate frame 18 and click on it. Look inside the packet and expand the Internet Message Format tab (expand as many levels as needed until you get to the Line-based text data). Answer the following questions from the email message		
4a	What is the name of the person sending the email message?	1	Pat Green
4b	When was she born?	1	Feb 10 1980
4c	What is her SSN?	1	123-44-3211
4d	Which part of the SMTP packed did you find this information in?	1	MIME Multipart Media Encapsulation
4e	In viewing this message, would you be concerned about Email security? How could the security be improved?	1	Yes as I was able to read all of the information in the email that the sender deemed confidential, to fix this we should use encryption.
5	Locate frames 14 and 15. What is the purpose of these 2 frames?	1	They carry data that is assembled in frame 18.
